DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-10, 46-53, drawn to a first process of producing an (n-5)-hydroxy fatty acid from an (n-6)-ene fatty acid using a microbe.

Group II, claim 11, drawn to a compound.

Group III, claims 12-45, 54-81, drawn to a second process of producing a δ -lactone from an (n-6)-ene fatty acid using a microbe.

An international or national stage application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the of following combinations of categories;

- (1) a product and a process specially adapted for the manufacture of said product; or
- (2) a product and a process of use of said product; or
- (3) a product, a process specially adapted for the manufacture of the said product, and a use of the said product; or
- (4) a process and a apparatus specifically designed for carrying out said process; or
- (5) a product, a process specially adapted for the manufacture of the said product and an apparatus specifically designed for carrying out said process. 37 CFR 1.475.

The groups of invention fall do not fall within category (1), a product and a

Art Unit: 1651

method of making product because the compound of Group II is not made by the process of Group I.

Groups I and III are methods which produce distinct products, namely a 5-hydroxy fatty acid and a δ -lactone. They do not share a special technical feature because they are distinct methods which produce distinct products using distinct materials and PCT Rule 13 does not provide for multiple methods within a single application.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 1651. The supervisor for 1651 is M.
